

## Customized SharePoint Web Part for a Top US Pharmaceutical Company

**F** With the amount of new information that the client faces daily, there arise a need to provide a new interface for the user of its portal to easily view and access these information. Founder International has been tasked to develop a new custom web part to meet this need.

### Client Overview

Our client is one of the Top10 US pharmaceutical companies. The client was looking to compile and aggregate their many different types of list from several SharePoint servers into an easy-to-access web part.

### Solution Highlights

A custom web part was developed with the following features:

- F** Ability to pull different types of list from multiple SharePoint servers.
- F** Ability to create multiple groups of different types of list in the web part.
- F** Built in a counter for each list item in a site (where this feature is deployed) to store the hit-count when a user clicks on the item.
- F** Built in a user ranking system for each list item in a site (where this feature is deployed) to allow the user to rank the item.
- F** The user is able to sort the grouped lists in the new web part by the item's latest date, hit-count or user ranking.
- F** An easy-to-use administrator interface to manage the abovementioned features.

### Benefits

The client is now able to easily create new grouped lists where items are aggregated from several SharePoint servers' sites.

### Project Snapshot

#### Industry

- Healthcare

#### Client Location

- New York City, NY   
USA

#### Services

- Customized Application Development

#### Implementation Details

- Onshore / Offshore Delivery Model
- 1 Month Development
- Team of 3

#### Technologies

- C# 3.0, .NET Framework
- Microsoft® Office SharePoint Server 2007
